Topics	Min No of assignments to be done for Hands on
HTML 5 Application Cache	
HTML 5 Best Practices	
HTML 5 Server Side Events	
HTML 5 Web Sockets	
HTML 5 Web Storage	
HTML 5 Web Worker	1
HTML 5 Geolocation	
Total	**1**

Topics Covered:
HTML 5 Web Storage, Web Worker and Geolocation
Take a number input (less than 100) from the user and save it to the web storage. Create a web worker to increment the number till it becomes prime. Provide two buttons of 'Start' and 'End' to start or end the process. Upon pressing 'end', the increment stops, or the number becomes prime – whichever occurs first.
